

HAWK URANIUM INC. – PROJECT STATUS TABLE (Last Updated: 09-06-22)								OTHER HOLDINGS
Project Name	McFauld's Lake – Hawk/MacDonald - McNugget JV Property	Holdsworth Property	Cluff Lake Property	Charlebois Lake Property	Cortez Property	Grand Calumet Property	The Sonora Claims	Wits Basin Precious Minerals Inc.
Region	Northern Ontario – James Bay Lowlands Canada	Northern Ontario – Wawa Canada	Saskatchewan - Athabasca Basin Canada	Northern Saskatchewan Canada	Northern Ontario – Elliot Lake Area Canada	Quebec Canada	San Bernardo, Sonora Mexico	China/South Africa/Colorado/Mexico
Size	6 contiguous claims (96 claim units) covering 1,554 hectares (3,840 acres)	19 contiguous mining claims covering approx. 304 hectares (760 acres) - 16 claims in S.Corbriere Township and 3 claims in N.Esquega Township	6 mining claims covering 16,239 hectares (40,127 acres)	12 mining claims covering 5,102 hectares (12,697 acres)	29 staked and optioned mining claims (total of 453 claim units) covering approx. 7,284 hectares (18,000 acres)	<ul style="list-style-type: none"> 8 claims totaling 354.6 hectares (876 acres) 39 additional & contiguous claims on approximately 1,550 hectares (3,830 acres) 	<ul style="list-style-type: none"> Raquel 2 – 9,451.575 hectares La Dura 8 – 100 hectares La Dura 8 – 109 hectares La Dura 5 – 90 hectares La Dura 5 – 500 hectares 	
Hawk's Net Interest	36.75% interest	100% owned Pays 1%GGRoyalty with right to buy back 0.5% 10% NPI reserved for initial vendors	100% owned NSR to be negotiated with finder	100% owned 2,5% NSR with right to buy back 1%	100% owned 2% NSR with right to buy back 1%	<ul style="list-style-type: none"> 70% interest – 3% GMR subject to a buyback of 1% 100% interest – 2% NSR on 39 claims subject to 1% buy back 	Hawk has a Letter of Intent (LOI) to acquire up to 100% in the Sonora mining claims (for a total of 10,250.575 hectares)	Directly and through its wholly-owned US subsidiary – Hawk Precious Minerals USA – Hawk owns an approx. 2.5% Core Shareholding of Wits Basin (3,482,500 million common shares).
Strategic Partner	MacDonald Mines Exploration Inc. 63.25% (TSX.V: BMK)	–	–	–	–	Globex Mining Enterprise Inc 30%	–	Wits Basin Precious Minerals Inc. OTC BB: WITM
Operator	MacDonald Mines	Hawk Uranium	Hawk Uranium	Hawk Uranium	Hawk Uranium	Hawk Uranium		Wits Basin
Target Commodity	Nickel/Copper/PGM	Gold and Silver	Uranium	Uranium	Uranium	Uranium	Gold/Silver/Zinc/Copper	
Project Description	<p>The Hawk-McNugget Property is enclosed within the larger MacDonald Mine Property.</p> <p>Re-interpretation of an airborne survey conducted in '04 indicates that there are many nickel targets on the McNugget Property.</p>	<p>The Holdsworth Property is host to 3 distinct geological environments</p> <ol style="list-style-type: none"> Soocana Vein – Lode Gold in traditional quartz veins Black Sand Zone – weathered oxide pyrite, and Sulphide pyrite zones at depth <p>Hawk has extended the Soocana Vein System (using mapping and sampling) from a strike length of approx. 300m to approx. 750m. The vein varies in width from 0.5m to 2.5m.</p>	<p>Adjacent to the Cluff Lake Uranium Mine, a past-producer with a historical output of 62.5 mill lbs. of yellowcake grading approx 22 lbs/ton.</p>	<p>The property contains 12 out of 18 delineated uranium showings in the area. Most of the known uranium showings occur on one mineralized trend & Hawk controls within its blocks approx. 16.5 km of the total strike length of 54 km of this known uranium mineralized trend.</p> <p>(Three additional mining claims added to the property in 2008).</p>	<p>A prominent radio-metric anomaly from a '02 government survey has been projected onto the Cortez Property. This property has the potential to host Uranium in pegmatites.</p>	<p>The property has a history of early uranium exploration in the mid 50's. A detailed airborne radiometric survey completed in 2006 identified numerous targets that warranted follow-up work.</p>	<p>The favourable geology consists of Grandodiorite, which covers a large portion of the Raquel w claim. The Granodiorite is the main source of epithermal gold, silver, zinc and copper mineralization. Structures are in close proximity or part of the NW-SE Mojave Sonora Mega-Shear. Major shears and faults crisscross the property.</p>	<ul style="list-style-type: none"> Acquisition of China Global Mining Res. (iron ore/nickel) Exploration program in Witwatersrand area of South Africa Rehabilitation of the Bates-Hunter gold mine in Colorado Wits has a 50% interest in the Vianey silver/gold/ zinc mine in Guerrero, Mexico.

HAWK URANIUM INC. – PROJECT STATUS TABLE Cont'd (Last Updated: 09-06-22)								OTHER HOLDINGS
Project Name	McFauld's Lake – Hawk/MacDonald - McNugget JV Property	Holdsworth Property	Cluff Lake Property	Charlebois Lake Property	Cortez Property	Grand Calumet Property	The Sonora Claims	Wits Basin Precious Minerals Inc.
Current Stage	<p>No new drilling was carried out on the Hawk JV in 2008.</p> <p>Developments in the McFauld's camp are being closely monitored by Hawk and its JV partner.</p>	<p>HUI NR 09-06-22: Hawk has signed a contract with Aardvard Drilling Inc. of Guelph, Ont. to carry out a 2,000 meter auger drill program on the Black Sands Zone.</p> <p>The purpose of the program is to quantify the gold/silver resource in the Black Sands surface zone – an approx. 4400m strike length , 4m width & 8m depth - as a follow-up to the metallurgical testing recently completed at SGS /Lakefield Laboratories. Upon completion, Hawk intends to complete a scoping study with the object to place the Zone into production in the near term.</p> <p>2008 - A 34-hole drill program was completed on the Soocana Vein and results received and analyzed.</p> <p>A total of 340kg of material from the Black Sands Zones was sent to SGS Lakefield for metallurgical testing - Gold recoveries ranged from 69% to 90% in a 48-hr agitated cyanide leach test</p>	<p>Heliborne electromagnetic (VTEM) & magnetic geophysical surveys completed in 2008.</p> <p>Final interpretation was received from Condor Consulting Colorado and is under review.</p> <p>Follow-up to be determined.</p>	<p>Heliborne electromagnetic (VTEM) & magnetic geophysical surveys completed in 2008.</p> <p>Final interpretation was received from Condor Consulting Colorado and is under review.</p> <p>Follow-up to be determined.</p>	<p>Field exploration consisting of line cutting, field mapping, ground magnetic & radiometric survey completed in 2008.</p> <p>Follow-up to be determined.</p>	<p>Hawk continues to negotiate surface access agreements with various holders of surface rights to this property in order to carry out recommended ground follow-up work.</p>	<p>HUI – NR 09-06-18: Hawk has completed an initial exploration program consisting of the collection of up to 2,000 rock chip samples, which have been sent to Jacobs Labs in Tuscon for analysis. Results are anticipated by the end of June, 2009. Upon receipt of the results of the exploration program (no later than July 31, 2009), Hawk will determine whether it wishes to acquire the Sonora Claims</p>	<p>WITM NR 09-01-14: Wits provided an update on the China transaction (re funding arrangements for the JV acquisition of the Xiaonanshan Mining Co., Ltd.</p>
